S U M M A R Y

Specialist of product development and R&D with a 14-year experience in technical topics related to Aerospace, Telecom and Artificial Intelligence for Proof of Concept, Minimum Viable Product & End-to-End. Engineer and HEC graduated, I am rigorous, follow standards and think out-of-the-box when MVP or E2E outcomes are at stake for innovative products.

S K I L L S

Product development	Artificial Intelligence / Agent AI	Python / C++ / API	AWS / GCP	Jira / Gitlab
Smart Card / Modem	LTE / 5G	SGP.22 / SGP.32 / IoT SAFE		
English – fluent		French - native		

E X P E R I E N C E

Software Developer with Artificial Intelligence & Automation

ENTREPRISE INDIVIDUELLE | Remote

2025 – present

- Chatbots & AI Agents : Missed Call Text Back & AI receptionist (Python, Retell, ElevenLabs, Claude)
- Automations (n8n, Make.com) using your softwares and cloud service provider (AWS and GCP)
- Reputation Management (Google Maps, Twilio, GHL)
- Websites & SaaS (Claude, Github, Vercel), Applications (React, Python, C++)

Software Activities Leader – E2E / NPI IoT

THALES GROUP | La Ciotat

2022 – 2026

- End-to-End live validation of global architecture thanks to applet inside eSIM plugged into real device or Mobile Simulator, Card Spy (ISO7816), Cellular Network Emulator (Amarisoft call box) and Remote Administration Server
- Demonstrations of 2 IoT PoC with cybersecurity embedding Artificial Intelligence (GSMA SGP.32)
- Development of nginx proxy and certificate chains to monitor payloads sent to MQTT broker (AWS)
- Support to develop a middleware (AWS or pkcs#11) in C/C++
- Customer trainings to ease product adoption

Co-Founder Startup – Concrete & IoT

HEC STARTUP | Toulouse

2019 – 2021

- Drive IoT module industrialisation from design to production with 285k€ budget to reach breakeven after 18 months
- Market growth : EBIT (9% at 2nd year) and cash management for R&D and sub-contractors
- IoT roadmap, feasibility analysis, market analysis, SWOT

Research Engineer and Work Package Manager

ISAE-SUPAERO | Toulouse

2014 - 2019

- European Research Programme ULTIMATE (H2020). Demo at Farnborough International Airshow 2018
<https://cordis.europa.eu/project/id/633436/fr> budget 3.1M€
Work Package Management with scrum method to drive project (4 engineers, 1 internship)
Aerodynamic and noise software development applied to Counter-Rotating Open Rotors : CFD and CAA software in python for wave propagation in environment on 12 cpu
- Feasibility of de-icing systems using piezoelectric technology on wings via automation and prediction : side project

E D U C A T I O N

Master of Science | HEC

Innovation and Entrepreneurship / Finance

2018 - 2020

Postgraduate program | University of Southampton | Erasmus

Aerodynamics / Computing

2013 - 2014

Engineer | Ecole Nationale Supérieure des Ingénieurs du Mans

Structural Dynamics / Computing

2011 - 2013
